Art Unit: 1725

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, 24-32 drawn to a system for controlling solidification, classified in class 29.
  - II. Claims 13-23, 33-41 drawn to a method of continuous casting, classified in class 164.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to roll the metal while not molten.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
